

ONICON's F-1000 Series Turbine Flow Meters with Bluetooth option will now be able to communicate wirelessly to our free turbine meter PC software. Meter data is transmitted in real time via Bluetooth interface for fast commissioning and troubleshooting.

- Real time diagnostic data sent directly to your PC
- Wireless connection via Bluetooth interface
- Makes commissioning and troubleshooting FAST!
- 50 ft connectivity range
- Save labor costs, reduce risk
- Retrofits available for meters shipped after March 2016

Leave the ladder on the truck!
